ULTRA

by ANKIT KHARE

Presented to the Faculty of the Graduate School of

The University of Texas at Arlington in Partial Fulfillment

of the Requirements

for the Degree of

MASTER OF SCIENCE IN COMPUTER SCIENCE

THE UNIVERSITY OF TEXAS AT ARLINGTON ${\rm May} \ 2019$

Copyright © by ANKIT KHARE 2019 All Rights Reserved To my selfless friends ;; who helped me stay on track and assisted me in many ways towards the completion of my thesis. And to my parents who gave me financial stability so that I never had to worry about anything but my thesis.

ACKNOWLEDGEMENTS

First of all, I would like to thank my supervising professor ;; for constantly advising and encouraging me. His invaluable advice, deep expertise in various computer science sub-domains and huge breadth in computer science as a whole has proved to be extremely helpful during the entire course of my graduate studies. I wish to thank my committee members ;; for their interest in my research and for taking time to be in my committee.

I would also like to extend my appreciation to ;; for providing financial support for my studies and giving me a stress free environment for continuing my research on many topics I have been interested in. I am especially grateful to ;; for his interest in my research and for the helpful discussions and invaluable comments. I wish also to thank my friend ;; for taking the time to critically evaluate this manuscript and my research papers.

I am grateful to all the professors who taught me during the years I spent as a graduate student. I would like to thank ;; whose computer vision class inspired me to study neural networks using online courses.

Finally, I would like to express my deep gratitude to my parents who have encouraged me and also sponsored my graduate studies.

CHAPTER 1 INTRODUCTION

Related Works

Earlier works.....achieved from addressing multiple lines of attentiveness could certainly provide better captions.

Method

$$\alpha = softmax(f^t) \tag{3.1}$$

$$\hat{v}^t = \sum_{s=1}^k \alpha_s^t V_s \tag{3.2}$$

3.0.1 CTX_latemb Model

This is the first variation of the baseline where \odot stands for element-wise multiplication, \bar{V} is from Eq. $\ref{eq:property}$, \hat{v} from Eq.

Analysis

- 4.0.1 Qualitative Analysis

BIOGRAPHICAL STATEMENT

Ankit Khare was born in Bhopal, M.P., India in 1991. He received his B.S. degree from ¡¿, India, in 2014, his M.S. degree from The University of Texas at Arlington in 2019 all in Computer Science. From 2014 to 2016, he was with ¡¿., as a ¡¿ . His current research interest is in the area of Computer Vision and Natural Language Processing using Deep Neural Networks.
